Sterilised Cat

**She may look the same after
sterilisation, but her nutritional
needs are very different**

choice of veterinarians™

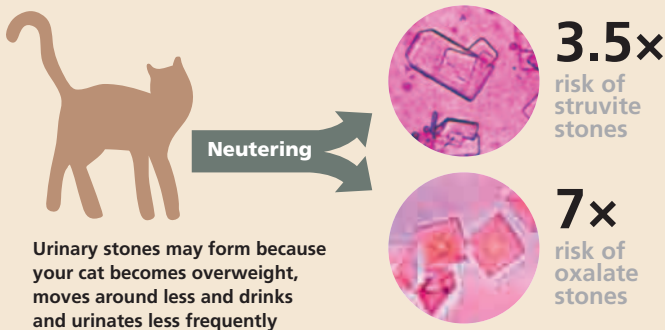

Your sterilised cat is at risk

Responsible pet owners sterilise their cats to avoid unwanted pregnancies. Whilst there are many health and behavioural benefits, after sterilisation cats are more likely to become overweight and develop urinary problems.

Sterilised cats are over 3 times more likely to become overweight¹

Sterilised cats are over 3 times more likely to develop bladder stones^{2*}

The good news is that specific nutrition can reduce these risks

* Most common bladder stones in cats: calcium oxalate and struvite.

Feeding sterilised cats for life

Specific formulas for Young Adult and Mature Adult cats

Mature cats have different nutritional requirements because their kidney function may deteriorate with age. Hill's™ Science Plan™ is the only product with two formulas to meet the specific nutritional needs of sterilised cats at every life stage.

Great tasting nutrition for just R3.39 per day*.

Feed her with care.
Keep her fit and healthy.

Sterilised Cat

*For an average cat weighing 4kg, fed on 350g bag as a R3.39 per day.

Introducing the NEW Hill's™ Science Plan™ Sterilised Cat

Precise nutrition to help sterilised cats keep fit and healthy at every life stage

Hill's™ Science Plan™ offers a precise formula that reduces the risk of your sterilised cat developing health problems:

Young Adult Chicken

Mature Adult Chicken

High levels of L-carnitine, clinically proven to help cats keep fit and active

High levels of L-lysine and controlled calories to help cats avoid weight gain

Controlled mineral levels to support kidney function and maintain a healthy urinary system at every life stage, especially in older cats

Antioxidant vitamins E and C to support immunity and neutralise free radicals associated with ageing

Balanced daily nutrition, for life

Your sterilised cat will remain at an increased risk of health problems throughout her life. That's why Hill's™ Science Plan™ Sterilised Cat has been formulated for healthy long-term feeding, for both young and mature adults.

The power of precise nutrition™

Hill's™ Science Plan™ range of advanced pet food products are precisely formulated to meet every individual cat's needs, whether she's in peak fitness and condition or has specific health and nutritional needs.

Every Hill's Science Plan product offers:

- A precise balance of 50 nutrients
- Clinically proven antioxidants to help support a healthy immune system
- High quality ingredients and natural preservatives

Plus, we're so confident that your cat will love the great taste of Hill's Science Plan that if she isn't completely satisfied, we will give you your money back.
